The new Tourismo.

Different for everyone. Perfect for you.

Mercedes-Benz
The standard for buses.
Dawn of a new era.

Secure a decisive advantage—and the satisfying feeling of having done your best for your driver, passengers and your company. The new Tourismo is more comfortable and flexible than ever before. As the standard model or flagship, it is the economic all-rounder for all segments.

The large choice of engines and vehicle lengths enables a more closely tailored configuration than ever. Form and function are in perfect balance so that there are no limits to your aspirations. Unmatched in its versatility, profitability, and equipped with the most advanced safety technology, it is the ideal choice.
Different for everyone. Perfect for you.

Comfort. The new Tourismo invites you on board through an ample and comfortable entry. Moreover, curved handrails make boarding the coach easier. Special service sets and optional charging facilities with USB and 230-volt sockets at every seat ensure a pleasant journey and enough power for electronic devices. Also, a new onboard galley makes long journeys comfortable.

Driver’s workspace. For the driver, there is a choice of two cockpit versions: the functional variant Cockpit Basic Plus, and the comfortable high specification Cockpit Comfort Plus. Both rely on a multifunction steering wheel, a new instrument panel with a high-resolution colour display, and a new electronic key system.

Interior space. The interior equipment can be configured exactly to your requirements. For example, the revamped Softline or the very comfortable Luxline are everything your passengers could wish for. The seats can be fitted with comfortable headrests and adjustable foot rests, making the journey even more pleasant. A wide range of different cover designs, fabrics and materials offer your new coach an individual look.
Green light for a new era: Perfection in Viper Green or Platinum Silver.

Now the colour comes into play. The paint finish in bold Viper Green draws full attention to the new Tourismo and confidently sets the tone. Its freshness and strength underscores the striking design. Alternatively, in Platinum Silver the Tourismo also makes a dazzling appearance. The classic coach imparts value in every nuance, leaving a lasting impression.
The highlight with many highlights.

A new era in the business segment. Never was a coach from Mercedes-Benz so comfortable, safe and efficient. Never has it suited your needs so perfectly. Because with its wide choice of engines, lengths, assistance systems, and equipment options the new Tourismo can be configured individually as never before, and offers real highlights for you and your passengers: striking design, versatility, superior economy, and the most advanced safety technology.

Because efficiency counts. With its timeless elegant form, the new Tourismo re-interprets the lines of its predecessor. Form and function work hand in hand and represent the basis for maximum efficiency. Thanks to the aerodynamics of the high-decker which have been improved down to the last detail the fuel consumption is considerably lower compared with the predecessor model. Even the flush-mounted driver windows and AquaBlade® windscreen wipers are not only visual highlights with their dynamic design, they also minimise fuel consumption and driving noise. And the Tourismo can do even more: the automatic body lowering available as an option saves fuel at motorway speeds. The trapezoidal rear window complements the styling with the Star typical of the brand.

A true adaptation artist. The Tourismo offers a host of new equipment features, which can be exactly tailored to your requirements. These include the separate daytime running light of the H7 headlamps, or the optional bi-xenon headlamp — for greater safety through better visibility. Equipment options such as puddle lighting when reversing, electric folding exterior mirrors, and roof hatches with rain sensor make your coach as forward looking as your company.
Always different. Always perfect.

Its numerous customisable features make the new Tourismo the ideal choice for your every requirement.

1. **Steering into the future.**
   With the optimised multifunction steering wheel, instruments such as the Coach smartInfotainment can be selected even more conveniently using function keys.

2. **Optimum visibility for greater safety.**
   A glare-free display provides all information at a glance, thus ensuring even greater road safety.

3. **The perfect seat.**
   The new Softline upholstery provides even greater seating comfort.

4. **Streamlined exterior.**
   Aerodynamic surfaces and swage lines reduce fuel consumption and increase profitability.

5. **Design with vision.**
   Modern design with distinctive, contemporary styling, superior quality and the best of safety standards. A range of fittings which can be adapted to suit individual tastes.
Choice of options redefined.

The new Tourismo combines maximum comfort, reliability and outstanding economy. Right from day one, the all-rounder pays off. Choose from four different models with two or three axles between 12.3 and 13.9 metres.

**The Tourismo**

- **Engine:** OM 936
Service and maintenance
If you choose only one key when it is in the road, Unlocked performance increases turnover and generates high loads. For your fleet, organised service and maintenance will keep your vehiclerunning at a high level of efficiency. To meet the needs of your fleet, Mercedes-Benz offers a wide range of services and solutions designed to help you optimise your investments in terms of cost and performance. The complete vehicle, as well as individual leasing and financing options are our passion. Mercedes-Benz Financial Services.

Residual value
A first class coach is an investment in the real cost. After all, a mobile asset of this size has a long service life and is required only after a long period of kilometres. Your vehicle for you. Economical and powerful BlueEFFICIENCY engines, high levels of luxury, numerous safety features and a comprehensive range of comfort features make the Tourismo a top class coach. The service package is also planned with the utmost care. We will listen to you carefully, for your fleet organisation. For this reason, Mercedes-Benz has opted for an extensive service network. The OMNI service network is available to you with tailored operators. Throughout the useful life of the vehicle, the services are designed to be particularly long-life, and easy to access.

Repair and maintenance
The OMNI service network is available to you with tailored operators. As a result, you can plan your maintenance interval and service costs more effectively. And that is where the Tourismo makes sure that every kilometre pays – because it is very economical. Compared to the predecessor model, it returns a lower energy consumption and emissions. Through the perfect interplay between vehicle technology, intelligent driving style analysis, and tailored OMNI **Expert Handling** plus driving style analysis, and tailored OMNI **Expert Handling** plus OMNI **Service**, the engine and all the major units*** are very accessible for easy maintenance. OMNI **Service** provides a complete range of customised services and a perfect supply of spare parts to get your vehicle back on the road quickly.

Consumption
There are several things you can do to drive a coach more efficiently. Approximately a third of the costs incurred can be actively influenced. New special equipment optional extras like the Predictive Powertrain Control (PPC) anticipate cruise control system for automated manual transmissions, or ECO Driver Feedback (EDF) with individual tips on driving style can further reduce the energy consumption.

The Tourismo offers your company total cost of ownership benefits in terms of investment, fuel consumption, maintenance, and residual value. Everything in the Tourismo is designed to minimise costly downtimes. Also, the long maintenance intervals with an oil change every 150,000 km** are required only after a long period in operation on the road. And that is where the Tourismo makes sure that every kilometre pays – because it is very economical. Compared to the predecessor model, it returns a lower energy consumption.

** Applies only for long distance travel with the OM 470 engine. With the OM 936 engine the maintenance interval is lower at 90,000 km.

*** The air conditioning system and the refrigerator of your vehicle are filled with the refrigerant R-134a, and contain a fluorinated greenhouse gas. Notices with detailed information on maintenance and the refrigerant can be found in the relevant technical information brochure. For more detailed information please see the relevant technical information brochure.

Every coach costs money. The new Tourismo saves it.

For decades coaches from Mercedes-Benz have been outstanding for their reliability and economic efficiency. The new Tourismo goes one step further toward the future and sustainability. It relies equally on state-of-the-art and mature series production technology with high quality standards. Thanks to advanced and very economical drives, together with aerodynamic optimisation, the fuel consumption of the models has been further reduced. In the future, there has been a rise in energy efficiency – the optimal total cost of ownership. This means maximum cost effectiveness for maximum road comfort.

Investment
Investment in a new coach is a decision that needs to be planned with the utmost care. We will listen to you carefully and help you to plan and organise your investments and select the perfect vehicle for you. Economical and powerful BlueEFFICIENCY engines, high levels of luxury, numerous safety features and a comprehensive range of comfort features make the Tourismo a top class coach. The service package is also planned with the utmost care. We will listen to you carefully.

With the Tourismo, Mercedes-Benz offers an EU-wide two year guarantee on the complete powertrain and a one year guarantee on the complete vehicle, as well as individual leasing and financing options are our passion. Mercedes-Benz Financial Services.

Reparis and maintenance cost time as well as money. Your fleet is permanently on the move, and to keep it that way it is essential to have regular and competent maintenance. The new Tourismo can be equipped with the latest FleetBoard Bus Data Center telema-

Digital services for your Mercedes-Benz.

Your new service world: the OMNIplus ON portal combines all the digital services you need. OMNIplus ON integrates existing as well as new services such as OMNIplus Uptime—for the intelligent networking of vehicle, driver and company and service. With a single portal, you can take advantage of personalized access to a variety of services. OMNIplus ON Advance monitors the technical health status of the fleet and ensures the highest possible vehicle availability. OMNIplus ON Monitor guarantees the best possible efficiency in operational fleet management. OMNIplus ON Drive simplifies many of your drivers’ daily tasks while making communication more efficient.

More information is available at www.omniplus-on.com

OMNIplus Uptime—Thinks ahead. Keeps you on the road.

The service that delivers the highest possible availability. With the optional OMNIplus Uptime, a service is available to you which automatically identifies a repair or maintenance requirement and, depending on the urgency, forwards it to the pan-European OMNIplus 24h SERVICE, an authorized service center or yourself. In doing so, OMNIplus Uptime differentiates between three levels of urgency: avoiding breakdowns, proactive repair and maintenance management as well as transparency regarding pending maintenance measures. With OMNIplus Uptime, breakdowns can be reduced and workshop stays ideally planned. This increases vehicle availability while lowering your overall costs. The technical prerequisite for the use of OMNIplus Uptime is an installed FleetBoard Bus Data Center.
In the development of innovative drive technologies, Mercedes-Benz remains true to its role as a leader in innovation. The BlueEFFICIENCY Power engines with BlueTEC® 6 are impressive for their high environmental compatibility and economy. Engine, transmission, drive axle, and exhaust gas aftertreatment — the drive components of the Tourismo are all from a single source and therefore perfectly tailored to each other.

Powerful performance. State-of-the-art in-line six-cylinder engines of the latest generation work in the rear. With a displacement of 7.7 litres or 10.7 litres, they are compact but nevertheless powerful. Depending on the model, the power output ranges from 260 kW (354 bhp) to 335 kW (456 bhp).

Long maintenance intervals. With the OM 470 engine, the first particulate filter change is only required after 360,000 kilometres in touring applications, followed by change intervals of 240,000 kilometres. In overland and tourist applications, oil in the OM 936 engine must be changed every 90,000 kilometres, and in the OM 470 engine every 120,000 kilometres.

Even more savings potential. Thanks to the optimised aerodynamics with a Cd value of 0.33, consumer load management, demand-related raising of the engine idle speed, and optimised battery charging, it has been possible to lower fuel consumption even further. Even more savings potential are available with the optional electronic assistant Predictive Powertrain Control and Eco Driver Feedback.

Optimal power transmission. In the Tourismo with the OM 470 265 kW engine, power transmission is performed by the six-speed manual transmission from Mercedes-Benz manufactured in-house. However, companies prefer to opt for the fully-automated eight-speed Mercedes-Benz GO 250-8 PowerShift transmission operated from the steering wheel stalk shift lever. This transmission specially developed for coaches impresses with its perfectly matched gear ratios together with the equally smooth and fast gear shifts. It takes the strain off the driver, the drive train and clutch.

In practice, high flexibility and powerful acceleration even at low speed are particularly important as they offer the driver optimal transmission of power from the engines.

A secure investment. Companies also benefit from the low energy consumption, the great reliability, and the long maintenance intervals. These characteristics make the Tourismo a highly cost-effective vehicle, whose purchase is rapidly amortised.

The best drive: Innovation.
Efficiency for our customers was the maxim when we developed the Tourismo. The broad spectrum of features enables a more targeted selection to meet the requirements, thereby offering the best conditions for profitable operation. So as an entry level power unit based on the proven drive concept of the in-line six cylinder there is the OM 936 with a displacement of 7.7 litres. Then comes the OM 470 with a displacement of 10.7 litres. The focus is on an engine power output of 280 or 315 kW (428 bhp).

The Mercedes-Benz OM 470 engine. The heart of the powertrain is the in-line six cylinder OM 470 with a displacement of 10.7 litres and three power ratings between 265 kW (360 bhp) and 335 kW (456 bhp). It combines high driving dynamics with low energy consumption. The engine with BlueTEC® 6 diesel technology is environmentally friendly and economical thanks to Selective Catalytic Reduction (SCR). With an OM 470 rated at 265 kW power transmission is performed as standard by the six-speed manual transmission manufactured in house. Optionally, the comfortable, smooth-shifting automated eight-speed Mercedes-Benz GO 250-8 PowerShift is also available.

The new top-of-the-range OM 470 engine with 335 kW (456 hp). It combines high driving dynamics with low energy consumption. With its variety of available engines, the Tourismo adapts perfectly to your company and your specific applications.

The Mercedes-Benz OM 936 engine. For customers with a focus is on maximum economic efficiency, the ideal choice is the compact OM 936 with a displacement of 7.7 litres and a power rating of 240 kW (324 bhp), coupled with the manual six-speed Mercedes-Benz GO 250-6. Given the appropriate topography and intended use, it offers maximum efficiency at minimal cost thanks to its comparatively low purchase price.

Invest in an economical engine.

Technical information:
all details are now online.
Spacious, friendly and well-appointed—that’s the reception for passengers presented by the interior of the Tourismo. The wide doors in the extended front entry and curved handrails make boarding easier, just like the kneeling function, which is already now part of the standard equipment of the Tourismo. Outstanding comfort. Numerous racks and stowage options make for a tidy, spacious interior. The multipanel roof dome blends seamlessly into the luggage shelves at the sides. The spacious feeling is made even more pleasant by a powerful air conditioning system* with fully automated two-zone control. Two separate circuits for heating and climate control ensure a uniform temperature inside the vehicle. Perfectly matched. An innovative approach has been taken in interior design using completely new colours and forms. This looks impressive with coordinated warm grey tones as standard. The colours harmonise perfectly with the different fabrics and trim options, which are available on request in the versions Piano black, Mocha oak, or Metal mesh. Just the way you want it. Whereas Piano black makes the trim elements gleam with a sleek black finish, Mocha oak with its multifaceted grain lends the interior a naturalness and warmth. Metal mesh makes the trim surfaces look modern and sporty. Even in the Basic version the Tourismo has a convincing appeal with its high-quality appointments, and can be upgraded and enhanced exactly as desired: with various interior colours, floor coverings, seat backs, sidewall trim, luggage racks, service sets, and ceilings.

As soon as you come on board: Design and comfort for a sense of well-being.
Here the focus is on comfort.

Depending on the application, the passenger compartment can be equipped with a focus on comfort or functionally. Features include the popular TravelStarEco (TSE) seating, which is available with swivel armrests, lateral adjustment of the side seats, adjustable backrests and footrests. In the revamped Softline version the configuration options are almost limitless. The Luxline upholstery meets the requirement for maximum comfort.

Standard upholstery
Combines comfort with economy.

Softline
The comfortable seat with style.

Luxline
The name says it all.

The revamped Softline:
• comfortable upholstery with additional fleece lining
• shaped backrest and quilting
• natural leather material
• Mercedes-Benz Star on the backrest optional

The Luxline upholstery meets the requirement for maximum comfort.
Whether in traditional coach travel or long distance service, passengers continue to demand more, particularly in terms of connectivity and passenger information systems. The Tourismo has been turned into a travelling hotspot; it can be equipped with a WLAN router for a fast Internet connection so that passengers can surf the web in comfort during their journey. To ensure the best possible entertainment, a variety of music or movies can also be made available to passengers via the Coach MediaRouter. Moreover, the Router also contributes to the safety of the bus. Every time the vehicle is switched on or off the anti-theft function sends you an email or SMS with the actual position via GPS.

Connect and go: Perfectly networked.
**The new generation of driver seats are available with optional, integrated climate control and seat heating, as well as a height adjustable 3-point seat belt system.**

There is nothing more important to passenger safety than a focused, relaxed driver. This is why Mercedes-Benz has made every effort to make the driver’s workspace in the Tourismo touring coaches as clearly laid-out and ergonomic as possible.

Driving pleasure in two variants. The size of the new Tourismo is also obvious behind the wheel. It offers two user-friendly cockpits with joystick gearshifts, high-quality finishing and outstanding comfort. Both the Basic Plus Cockpit functional version and the more comfort-oriented Comfort Plus Cockpit version are available. Both versions are characterised by a Basic Key electronics key system. Optionally, the system can be extended to the Standard Key system with remote-controlled central locking.

Full comfort—full control. The basic design, including the new multifunction steering wheel and new instrument system, is identical in both models. All instruments are clearly arranged and easy to reach without altering the seating position. The further optimised multifunction steering wheel and the high-resolution TFT colour display with intuitive, easy-to-use Stacks and Cards menu make working behind the wheel easier. Additionally, the Coach smartInfo- 

The anti-glare display provides all the important information at a glance, and assists the driver when requested with more information, such as tour data or fuel consumption. The driver is thus able to direct his or her full attention to the road—a significant contribution to driving safety. The driver will also find storage options and spacious lockers. The refriger-ator* in Cockpit Basic Plus offers a volume of 54 litres, and the cockpit can be combined with a till and payment system. As an option, a safe can be located in a step.

Space for driving pleasure: The choice is yours.

Customising your equipment: the Basic Plus Cockpit. The refrigerator* in the Basic Plus Cockpit offers a volume of 54 litres. The cockpit can be combined with a cash register and payment system. On request, a safe can also be integrated into one of the steps.

Takes the long out of long distances: the Comfort Plus Cockpit. More space and comfort for those long journeys. Cockpit Comfort Plus offers the driver even more convenience than the standard configuration. The refrigerator* now holds 67 litres, and two more storage spaces in the centre-console keep the cockpit tidy. Beside the exceptionally comfortable driver’s seat*, there is a new driver’s companion seat, that offers more space near the entry.

---

* See comment *** on page 18.

**The new generation of driver seats are available with optional, integrated climate control and seat heating, as well as a height adjustable 3-point seat belt system.**
One thing is certain: Everything is safe.

Uncompromising safety and unbeatable utility value — that's what the new Tourismo stands for. The coaches have been among the safest in their class for generations, and each new model offers even greater protection.

The benchmark in the business segment. The Tourismo sets all new standards with its sophisti­cated standard safety technology. Numerous new electronic helpers have been integrated to assist the driver and prevent accidents. These include ABA 4, Sideguard Assist, ABS, ESP, EBS and Airbags for fatigue detection. Another unique feature is the Tourismo segment is the Micro-Bulldog Guard (FSG) to protect the driver and attendant in the case of a frontal collision. The extensive safety technology with ABS, Electronic Stability Program (ESP®), Lane Assist (LAS) and Rain Light Sensor ensures a very positive driving experience. Add to this the latest safety and assistance systems ensure that the Tourismo can continue an action that could lead to a collision, an additional visual warning is given: The LED light flashes several times red with higher luminosity and then permanently. In addition to this, a tactile vibration acts as a warning in the driver's seat. Moreover, in addition to moving vehicles and stationary obstacles ahead (e.g., the tail-end of a traffic jam), the system also detects pedestrians within 100 metres. For example, it checks the distance to pedestrians dangerously reduced, the system alerts the driver by means of visual and acoustic warning signals, while initiating partial braking through to a standstill if the driver does not respond. The partial braking provides the driver with the possi­bility of avoiding the collision by means of full braking or steering manoeuvres. Addi­tionally, he can wear underside ped­estrians in time using the vehicle's horn.

Additional assistance of visual and acoustic warning signals, while initiating partial braking through to a standstill if the driver does not respond. The partial braking provides the driver with the possi­bility of avoiding the collision by means of full braking or steering manoeuvres. Addi­tionally, he can wear underside ped­estrians in time using the vehicle's horn.

Active Brake Assist 4 (ABA 4)

Active Brake Assist 4 (ABA 4) reduces the driver's reaction time and therefore better protects the driver and occupants. The combination of Active Brake Assist 4 and FCG provides unprecedented levels of safety for drivers and occu­pan­ts as well as for passengers. The FCG meets ECE R 13 suspension protection require­ments, as well as legal standards for the pendulum impact test on buses.

Active Cruise Control (ACC)

The Adaptive Cruise Control is standard equipment on the Tourismo. The Adaptive Cruise Control system ensures that the driver always maintains a defined security distance to the vehicle in front. The advantage: The driver is relieved from the task of maintaining a defined distance from the vehicle in front, which is especially useful when driving in congested traffic or the traffic in front is moving slowly or stopped. The Adaptive Cruise Control system monitors the distance to the vehicle ahead, based on continuous measurements.

The Adaptive Cruise Control feature relieves the driver of the possible consequences of an accident. The Adaptive Cruise Control system can also take on the task of a lane changing assistant, in which case it operates with the assistance of ABA 4, ART (Active Brake Assist 4). The system initiates a smooth braking with a maximum of 20 per cent of its possible power. The system also helps to prevent the vehicle from exceeding the speed limit. In the event of a collision, the Front Guard (FSG) offers increased safety in the front area of the vehicle, as well as reliable underpinning protection to the trans­verse profile. Behind the FCG, the transverse profile is crash-resistant with an absorber structure that converts impact energy into deformation energy in the case of an accident. The consequences of the impacts for all vehicle occupants are therefore significantly reduced. Since the driver's seat — including steering, pedals and seat — is mounted on a variable frame section, it can completely move towards the rear in the event of a serious frontal collision and therefore better protect the driver's space. The combination of Active Brake Assist 4 and FCG provides unprecedented levels of safety for drivers and occu­pan­ts as well as for passengers. The FCG meets ECE R 13 suspension protection require­ments, as well as legal standards for the pendulum impact test on buses.

SpA

The Lane Assist (SpA) function warns the driver against unintentionally leaving the lane without operating the indicator. With the help of a camera system behind the windshield, SpA recognises when the vehicle deviates from the road line. The driver is then provided with a significant vibration in the corresponding side of the driver's seat. The SpA is active beginning at a speed of 70 km/h. Pressing the indicator deactivates the Lane Assist, for example when the driver initiates a desired lane change.
Leaving a lasting impression.

The new Tourismo has many faces—and each one is unforgettable. It takes you with it on every journey and transforms it into a comfort experience. That is enthusiasm made by Mercedes-Benz. Get started with the Tourismo at a new level of quality and expressive power. Set off into a new era.
Contact us today if you want to set standards for tomorrow.

OMNIplus Service for your pit stop. OMNIplus ensures you save time and money. Increase the operational readiness of your fleet with the comprehensive BusDepot Management service, or take advantage of the flexible BasicPlus and Premium service contracts for repair and maintenance. Choose from the various annual mileages, and combine these with the service life that fits the requirements of your company. OMNIplus is also your point of contact for original parts and accessories, as well as reconditioned parts with certified quality. Whether you need a V-belt, blower or brake discs—OMNIplus has the right original part for your Mercedes-Benz bus or coach.

OMNIplus service on the move. OMNIplus ensures that your Mercedes-Benz stays on the road—e.g. with the most extensive bus-specific Service Network in Europe with more than 600 authorised Service Points as well as the highly advantageous ServiceCard. The reliable 24h SERVICE is also being further optimised through Telediagnosis. Preventive service is possible with OMNIplus Uptime*. With TireService and the Germany-wide BusPool*, OMNIplus also delivers reliable assistance in the event of a breakdown.

It’s safe to say you’ll get the right training. Our experienced OMNIplus training specialists offer practical solutions for current training, be this safety, environmental, vehicle or emergency training, the latest technical knowledge for repair and servicing work, or training for drivers or workshop staff. OMNIplus provides the right training for every requirement. www.omniplus.com

* The technical requirement for the use of OMNIplus Uptime is a built-in FleetBoard Bus Data Center.
Important for you. Important for us. Technical data stored in the vehicle.

Electronic vehicle components (e.g. Engine Control Unit) contain data storage for vehicle technical data, including but not limited to Diagnostic Trouble Codes in the event of a malfunction, vehicle speed, braking force, or operating conditions of the Restraint System and Driver Assistance Systems in case of an accident (no audio and no video data recording). This data is either stored as a volatile e.g. Diagnostic Trouble Codes, over a short period of time (a few seconds only) e.g. in case of an accident or in aggregated form e.g. for component load evaluation. The data can be read using interfaces connected to the vehicle. Trained technicians can process and utilise the data to diagnose and repair possible malfunctions. The manufacturer can use the data to analyse and improve vehicle functions. When requested by the customer, technical data can form the basis of additional optional services. In general, data from the vehicle is transferred to the manufacturer or a third party only where legally allowed, or based on a contractual customer consent in accordance with data protection laws. Further information regarding storage of vehicle technical data is provided in the vehicle owner’s manual. Mercedes-Benz Buses and Coaches naturally handles customer data confidentially.

About the information in this brochure.

Information about the product is subject to change after this brochure went to press (08/18). The manufacturer reserves the right to make changes in the design or form, deviations in colour, and changes to the scope of supply during the delivery period, in so far as the changes or deviations are reasonable for the customer, having regard to the interests of the seller. The illustrations may also show accessories and special equipment optional extras that do not form part of the standard scope of supply. Colours may vary for typographical reasons.

This brochure may also contain models and support services that are not available in some countries. Statements about statutory, legal and tax regulations and their effects are only applicable in the Federal Republic of Germany at the time this brochure went to press.
